PROFESSIONAL SUMMARY

Computer Science teacher and self-driven Python developer who builds full-stack web applications and AI-powered tools outside the classroom. Hands-on experience with Python, Django, React JS, and MySQL across real-world projects — including AI chatbots, automated MCQ generation, a student learning management system, and a phishing-website detection tool. Backed by Python-focused certifications from Google, the University of Michigan, and Saylor Academy, and a bachelor's degree in computer science.

WORK EXPERIENCE

Computer Science Teacher

SM Academy | Dec 2024 – Present

- Teaching programming and computer science fundamentals to students from class 1 to 12
- Designing customized, student-centered lesson plans using active-learning techniques to suit different age groups and learning levels
- Building and maintaining real-world Python/AI projects (chatbots, MCQ generation, web platforms) alongside teaching duties to keep curriculum hands-on and current

TECHNICAL PROJECTS

- SM Academy — Full-Stack Educational Website** | Python, Django, React JS, MySQL — built and maintain the complete SM Academy website end-to-end, with a React JS frontend, Django/Python backend, MySQL database, and an integrated AI chatbot for student support
- GCI Web Platform** | React JS, Django, Python, MySQL — developed the GCI platform with a React JS frontend and a Python/Django backend backed by MySQL, including an integrated AI chatbot for user queries
- SLMS — Student Learning Management System** | Python, Django, MySQL, AI — built a Django-based LMS with an AI-powered MCQ generator that automatically creates assessment questions from course content (published research paper — see Publications)
- AI Phishing Website Detector** | Python, Machine Learning — built a tool that analyzes URLs and webpage content with Python and AI to detect and flag phishing links
- AI Chatbot Framework** | Python, AI/NLP — designed a reusable conversational chatbot deployed across multiple projects, including SM Academy and GCI, to handle student and user queries

PUBLICATIONS & RESEARCH

Artificial Intelligence-Based MCQ Generation and Auto-Evaluation in Smart Learning Management System (SLMS)

Research paper on the AI-powered MCQ generation and auto-evaluation engine built for the SLMS project.

Researcher Profile: [Academia.edu](https://www.academia.edu) — gcuf-pk.academia.edu/MARif

EDUCATION

Bachelor of Science in Computer Science | 2026

Government Post Graduate College, Jhang | GPA: 3.5/4.0 | Coursework: Data Structures, Algorithms, OOP, Database Management

Diploma in Computer Applications | Oct 2021 – Mar 2022

Government Technical Training Institute, Jhang | Grade: A+ (94/100) | Punjab Board of Technical Education, Lahore

Professional Certificate in Office Management | Jun 2021

INFOCS Computer Literacy Centre, Jhang | Grade: A (574/600) | 6 months — MS Office, Photoshop, CorelDRAW, InPage

CERTIFICATIONS — PYTHON PROGRAMMING (14 CERTIFICATIONS)

- **Python for Everybody** — Specialization, University of Michigan (Coursera)
- **Google IT Automation with Python** — Professional Certificate, Google (Coursera)
- **Introduction to Scripting in Python** — Specialization, Rice University (Coursera)
- **Python Data Structures** — University of Michigan (Coursera)
- **Programming for Everybody (Getting Started with Python)** — University of Michigan (Coursera)
- **Python Programming Essentials** — Rice University (Coursera)
- **An Introduction to Programming using Python** — University of Leeds (Coursera)
- **Python Programming Fundamentals** — Microsoft (Coursera)
- **Python Fundamentals** — Corporate Finance Institute (Coursera)
- **Crash Course on Python** — Google (Coursera)
- **CS105: Introduction to Python** — Saylor Academy (Grade: 77.20%)
- **Basics of Python (CR641)** — Cambridge International Qualifications / UniAthena, Level 7 (Score: 100/100)
- **Python Basic Certificate** — HackerRank
- **Free Python 101 Class Beginners Bootcamp** — Udemy

SKILLS

Programming: Python, JavaScript (ES6+), C, C++

Web Development: Django, React JS, HTML5, CSS3, Bootstrap 5

AI & Automation: Chatbot Development, AI-based MCQ Generation, Machine Learning, Phishing/Threat Detection

Databases: MySQL, SQL, SQLite

Tools & Methodologies: Git, VS Code, Jupyter Notebook, Agile, Scrum, OOP

Teaching & Soft Skills: Active-Learning Design, Curriculum Planning, Problem-Solving, Team Collaboration

ACHIEVEMENTS

- **Ranked in top 10%** of Computer Science students at Government Graduate College (Jhang) with a 3.5/4.0 GPA
- **Solved 300+ programming problems in Python** on LeetCode/HackerRank, mastering data structures and optimization
- **Built and deployed 5+ Python-based projects** — full-stack platforms, AI chatbots, automated MCQ generation, and a phishing-detection tool — using Python, Django, React JS, and MySQL

LANGUAGES

Urdu: Native (C2) **English:** Professional Proficiency (B2)
